INDEX TO VOLUME 19

*Starred items are "Shorter Notes"

Abramowich, John. *A note on the characteristic numbers of linear systems of differential-difference equations*, 50.
Adams, W. W. *Asymptotic Diophantine approximations and equivalent numbers*, 231.
Alo, R. A. and Shapiro, H. L. *Extensions of totally bounded pseudometrics*, 877.
Anderson, John. *Concerning the finite model property for propositional calculi*, 1207.
Andrews, G. E. *On partition functions related to Schur's second partition theorem*, 441.
Ang, D. D. and Daykin, D. E. *Some fixed point theorems and convolution equations*, 1187.
Apostol, Constantin. *On the roots of spectral operators*, 811.
Appel, K. I. *One-variable equations in free groups*, 912.
Appling, W. D. L. *Integral representations and refinement-unboundedness*, 837.
Arsove, M. G. *The Osgood-Taylor-Carathéodory theorem*, 38.
———. *Some boundary properties of the Riemann mapping function*, 560.
Askey, Richard. *L^p behavior of power series with positive coefficients*, 303.
*Askey, Richard, Fitch, James and Gasper, George. *On a positive trigonometric sum*, 1507.
Baker, H. L., Jr. *Complete amonotonic decompositions of compact continua*, 847.
Ball, R. W. *Indices of maximal subgroups of infinite symmetric groups*, 948.
Bank, Steven. *On principal solutions of linear differential equations*, 724.
Bateman, J. M. and Coleman, D. B. *Group algebras with nilpotent unit groups*, 448.
Baxter, W. E. *On the subring generated by the symmetric elements*, 943.
Bebernes, J. W. and Gaines, Robert. *A generalized two-point boundary value problem*, 749.
Bechtell, Homer. *Nonzenerators of rings*, 241.
Behzad, Mehdi and Radjavi, Heydar. *The total group of a graph*, 158.
Bose, A. K. *Generalized eigenfunctions of the Laplace operator and weighted average property*, 55.
Bowman, R. H. *On the extensive derivative*, 642.
Bredon, G. E. *A space for which $H^1(X; Z) \neq [X, S^1]$*, 396.
Brown, C. C. *On the finite measures on the closed subspaces of a Hilbert space*, 470.
———. *Errata to "On the finite measures on the closed subspaces of a Hilbert space,"* 1509.
Brumer, Armand and Rosen, Michael. *On the size of the Brauer group*, 707.
Burdick, R. O., Conner, P. E. and Floyd, E. E. *Chain theories and their derived homology*, 1115.
Burgess, C. E. and Loveland, L. D. *Sequentially* 1-ULC *surfaces in E^3*, 653.
Calabi, L. and Hartnett, W. E. *A Motzkin-type theorem for closed nonconvex sets*, 1495.
Caldwell, W. V. PR-*factorizations of families of light interior functions*, 299.
Cannon, L. O. *On a point-segment decomposition of E^3 defined by McAuley*, 624.
Cantwell, John. *A topological approach to extreme points in function spaces*, 821.
Carlson, B. C. and Tobey, M. D. *A property of the hypergeometric mean value*, 255.
Carlson, David. *On some determinantal inequalities*, 462.
Chao Chong-Yun. *A theorem of nilpotent groups*, 959.
Chew, K. L. *On a conjecture of D. C. Murdoch concerning primary decompositions of an ideal*, 925.

Burgess, C. E. and Loveland, L. D. *Sequentially 1-ULC surfaces in E^3*, 653.
Calabi, L. and Hartnett, W. E. *A Motzkin-type theorem for closed nonconvex sets*, 1495.
Caldwell, W. V. PR-*factorizations of families of light interior functions*, 299.
Cannon, L. O. *On a point-segment decomposition of E^3 defined by McAuley*, 624.
Cantwell, John. *A topological approach to extreme points in function spaces*, 821.
Carlson, B. C. and Tobey, M. D. *A property of the hypergeometric mean value*, 255.
Carlson, David. *On some determinantal inequalities*, 462.
Chao Chong-Yun. *A theorem of nilpotent groups*, 959.
Chew, K. L. *On a conjecture of D. C. Murdoch concerning primary decompositions of an ideal*, 925.

Cima, J. A. and Colwell, Peter. *Blaschke quotients and normality*, 796.
Coleman, D. B. See Bateman, J. M.
*Coles, W. J. *A simple proof of a well-known oscillation theorem*, 507.
———. *An oscillation criterion for second-order linear differential equations*, 755.
Colwell, Peter. See Cima, J. A.
Conner, P. E. See Burdick, R. O.
Conrad, P. F. *Subdirect sums of integers and reals*, 1176.
Cook, Howard and Fitzpatrick, Ben, Jr. *Inverse limits of perfectly normal spaces*, 189.
Copeland, A. H., Jr. *Deleted products with prescribed homotopy types*, 1109.
Copeland, A. H., Jr. and Mahowald, Mark. *The odd primary obstructions to finding a section in a V_n bundle are zero*, 1270.
Cossey, John. *Laws in nilpotent-by-finite groups*, 685.
Cowling, V. F. and Royster, W. C. *Domains of variability for univalent polynomials*, 767.
Dang-Xuan-Hong. *A note on fixed point theorems for a family of nonexpansive mappings*, 1223.
Darling, D. A. and Erdös, P. *On the recurrence of a certain chain*, 336.
Das, Minaketan. *Properties of certain spaces of entire functions*, 773.
Davis, H. S. *A note on connectedness im Kleinen*, 1237.
Davis, W. J. *M-similarity and isomorphisms in B_0-spaces*, 332.
Dawson, D. F. *Matrix summability of convex sequences*, 1035.
Daykin, D. E. See Ang, D. D.
deGroot J. and Maurice, M. A. *On the existence of rigid compact ordered spaces*, 844.
Deokinandan, B. *On the strong (L) summability of Fourier series*, 33.
Derwent, J. *A note on numerable covers*, 1130.
———. *Inverses for fiber spaces*, 1491.
Deshpandé, J. V. *On continuity of a partial order*, 383.
Dickman, R. F., Jr. *Some characterizations of the Freudenthal compactification of a semicompact space*, 631.
Dierker, Paul. *Note on collapsing $K \times I$ where K is a contractible polyhedron*, 425.
Dixmier, Jacques. *Localization of a theorem of Glimm*, 364.
Dornhoff, Larry. *Simple groups are scarce*, 692.
Doss, Raouf. *On the transform of a singular or an absolutely continuous measure*, 361.
Dowson, H. R. *On the commutant of a complete Boolean algebra of projections*, 1448.
Doyle, P. H. *On monotone unions of manifolds*, 854.
Drasin, David and Earle, C. J. *On the boundedness of automorphic forms*, 1039.
Eagon, J. A. *The Grothendieck group of finitely generated modules*, 1341.
*Eagon, J. A. and Fraser, M. M. *A note on the Koszul complex*, 251.
Earle, C. J. and Marden, A. *Projections to automorphic functions*, 274.
Earle, C. J. See Drasin, David.
Eaves, D. M. *Random generalized functions of locally finite order*, 1457.
Eberhart, Carl. *Tychonoff cubes are coset spaces*, 185.
Elliott, E. O. *An extension theorem for obtaining measures on uncountable product spaces*, 1089.
Embry, M. R. *Nth roots of operators*, 63.
England, J. W. and Martin, N. F. G. *On the entropy of isometries of compact metric spaces*, 799.
Enochs, Edgar. *Totally integrally closed rings*, 701.
Erdös, P. See Darling, D. A.
Evens, Leonard. *Steenrod operations and transfer*, 1387.

Faber, R. L. *The existence of gauge forms on affine varieties*, 1075.
Farkas, H. M. *Special divisors on compact Riemann surfaces*, 315.
Faudree, Ralph. *A note on the automorphism group of a p-group*, 1379.
Fein, Burton. *Lifting modular representations of finite groups*, 217.
Felscher, Walter. *On criteria of definability*, 834.
Fife, P. C. *Domains of uniqueness for parabolic equations*, 1413.
Fine, A. I. *Covering theorems and the axiom of choice*, 787.
Fisher, Stephen. *Norm-compact sets of representing measures*, 1063.
*Fitch, James. See Askey, Richard.
Fitzpatrick, Ben Jr. See Cook, Howard.
Floyd, E. E. See Burdick, R. O.
Foata, Dominique. *On the Netto inversion number of a sequence*, 236.
Foguel, S. R. *Convex combinations of Markov transition functions*, 345.
Fraser, M. M. See Eagon, J. A.
